(USING HTML & CSS)

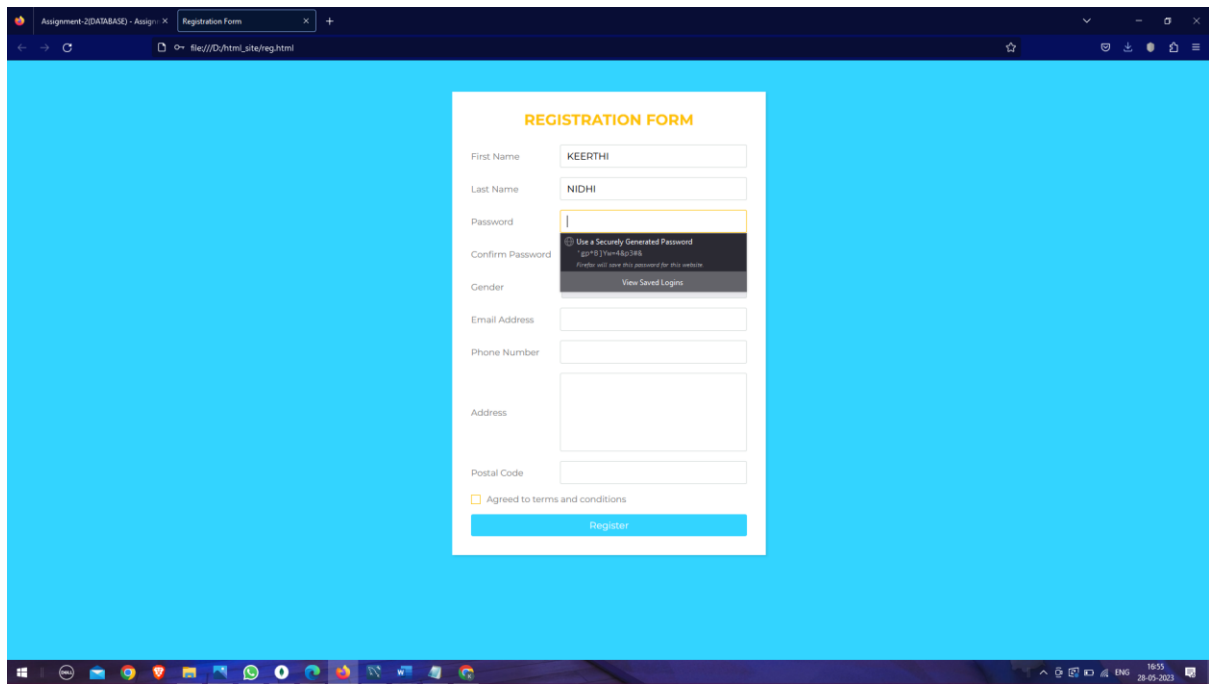

The screenshot shows a web browser window with a single tab titled "Registration Form". The address bar displays "file:///D:/html_site/reg.html". The page has a solid blue background. The form contains the following fields: "First Name", "Last Name", "Password", "Confirm Password", "Gender" (a dropdown menu with "Select" as the placeholder), "Email Address", "Phone Number", "Address" (a larger text area), and "Postal Code". Below these fields is a checkbox labeled "Agreed to terms and conditions". At the bottom of the form is a blue button labeled "Register". The Windows taskbar is visible at the bottom of the screen.

FILLING THE FORM

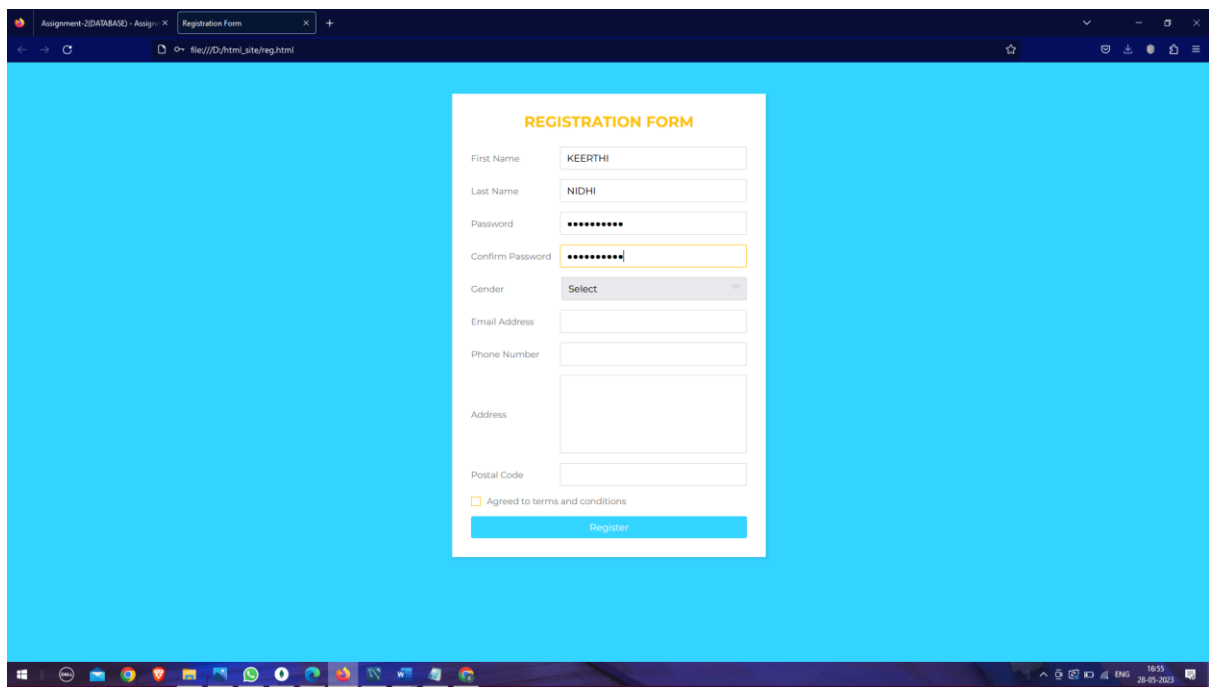

This screenshot shows the same registration form as above, but with some fields filled. The "First Name" field contains the text "KEERTHI". The "Last Name" field contains the text "NIDHI". The "Gender" dropdown menu is still set to "Select". All other fields, including "Password", "Confirm Password", "Email Address", "Phone Number", "Address", "Postal Code", and the "Agreed to terms and conditions" checkbox, are empty.
